July 20, 2009

“SentrySafe proudly offers different levels of fire-resistant, waterproof and water-resistant and security technologies to meet our customers’ needs,” said Sondra McFarlane, marketing communications director for SentrySafe.

“There are many different protection levels to consider when purchasing a safe and customer’s can trust that our products live up to the claims on the package. All SentrySafe products have undergone rigorous independent testing by either Underwriter’s Laboratories or ETL Semko and are certified to be in compliance with manufacturer’s specifications to secure and protect our customer’s most valuable items and documents from personal or natural disasters.”
